

## DrainOne

# Automatic drain dosing system

## Overview

DrainOne is SEKO's response to the common problem of grease and fats causing drain lines and grease traps to become blocked within food-service applications.

This compact, reliable and user-friendly system keeps waste channels free of blockages by periodically dosing an enzyme directly into drain lines, with multiple

As well as removing the need to manually dose chemical, this environmentally-friendly solution requires minimal maintenance while its small footprint makes it suitable for kitchens within sites of all sizes, from large-scale restaurants to cafes to takeaways.

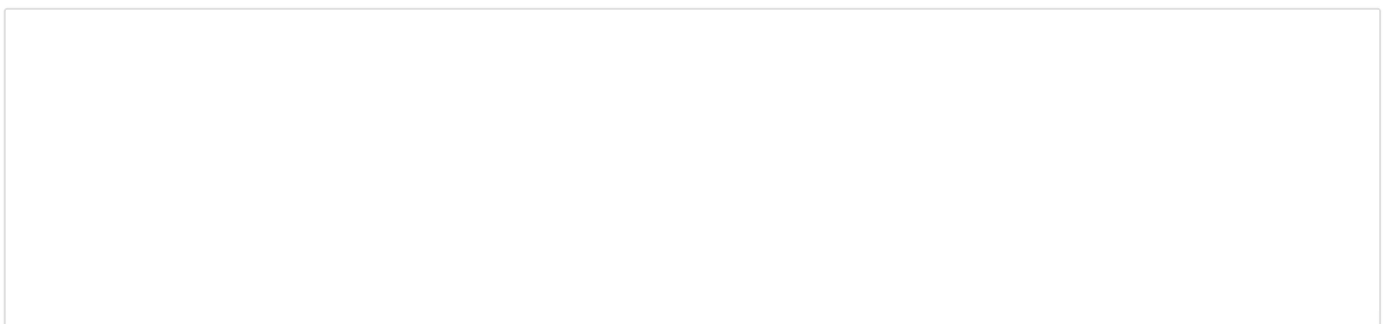

## Features

- Delivers a single chemical at predetermined intervals
- Programmable initial delay time
- Quick and easy installation
- Low maintenance
- Robust design
- IP65 protection
- Programming password protection

## Specification

- Power supply: 100 - 240 Vac, 50 - 60 Hz
- Power consumption: 5 W
- Flow rate: 7 l/h
- Pressure: 1 bar
- Squeeze tube: Santoprene
